

NeuroLinks Comes To Toronto

NeuroLinks, the nationally acclaimed program designed to help those suffering from Processing Disorder, is coming to Toronto. The program is successfully curing hundreds of children and adults in Brooklyn and Lakewood with academic, behavioral, and social issues. Says Chayala Taub of NeuroLinks Lakewood, "I spoke to a few parents in Toronto about the program, and the response was overwhelming. I think it's time to change some lives in Toronto!"

Physio-Neuro Therapy was first introduced to the educational world in 1988 to assist those children and young adults who were battling ADHD, dyslexia, lack of focus, experiencing behavioral problems and generally performing poorly academically. The therapy's intense one-on-one method uses mental and physical exercises to strengthen cognitive skills and treat each individual's specific needs.

For more information, contact NeuroLinks at 732-664-2024 or visit www.neurolinkstherapy.com.

Zahler's Community Plan

Over the past few years, we at Zahler's have watched our community struggle with ADD/ADHD and hyperactivity. We are also aware of the consequences that may develop when leaving this condition untreated.

Parents often have to face the difficult decision of whether or not to medicate their child. That's why we at Zahler's are offering a different option. KidsActive/TeenFocus vitamins are a natural alternative to ADHD medication which targets the neurological root of the problem. KidsActive offers real effects without the side effects.

Thus has Zahler's partnered with local schools in providing complimentary bottles of KidsActive/TeenFocus to eligible families. For more information or to request an application form, contact your child's school.

A Mouth Rinse That Really Works

Cancer patients undergoing chemotherapy and others who suffer from troublesome mouth sores due to immunodeficiency may benefit greatly from a new mouth rinse that adheres to the oral mucosa in

the mouth, allowing the rinse's medications to soothe and heal the wounds. Available since April of 2014, this new medication has been used by many patients and the results so far have been remarkable.

Simcha Shain is a Hatzolah Paramedic who spends his summers as a volunteer at Camp Simcha. He's seen many patients with mouth sores and says, "Patients have observed real results. They are able to eat and drink again with less discomfort."

The rinse is compounded at a premier pharmacy in Florida and can be shipped overnight to patients once their doctor fills out a specific script.

For more information, call 732-330-4400 or email info@refuah.com.

Kavanah Kards Make A Huge Difference!

Kavanah Kards are changing people's relationship with Hashem! Distributed free of charge, this beautiful line of inspirational cards helps to increase focus and dedication during tefillah. So far over 40,000 cards have been distributed in six countries. They will soon be available in Australia.

The response to Kavanah Kards has been tremendous. "It touches my neshama!" says one user. "Can't begin to tell you what a difference it makes in my davening!" says another.

The newest Kavanah Kard is just four inches wide, perfect for use in small siddurim. People of all ages as well as students of Yeshivos and seminaries are taking advantage of the inspiration that the cards have to offer. From Atlanta to Toronto to Far Rockaway to Monsey, Kavanah Kards are revolutionizing the way Klal Yisroel davens.
